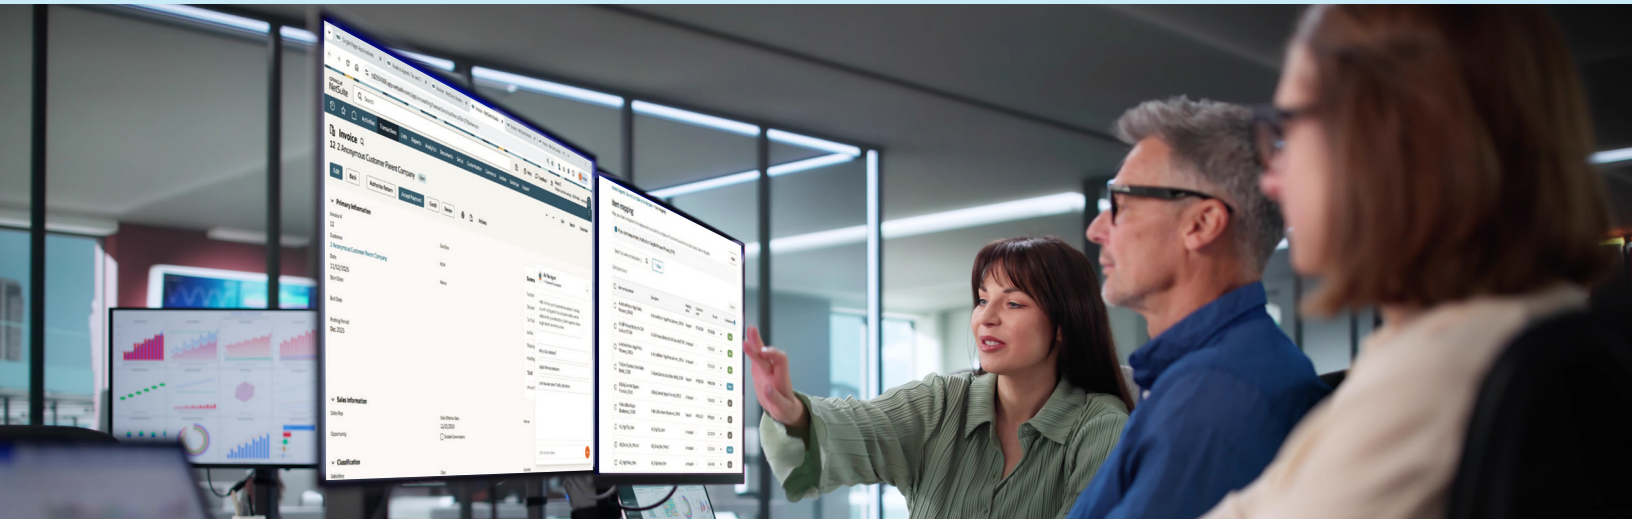
Avalara | ORACLE NetSuite

AI-powered tax automation inside NetSuite

Extend SuiteTax with embedded intelligence that helps configure, calculate, and manage compliance across entities.

Keeping up with changing tax rules, economic and physical nexus laws, and evolving global compliance mandates is complex – especially as your business grows. Avalara extends and enhances SuiteTax with AI-powered automation that helps NetSuite customers manage end-to-end compliance with confidence.



Meet Avi, your AI tax and compliance agent inside NetSuite

Avi is an embedded AI tax agent designed to guide, explain, and optimize your compliance workflows directly inside NetSuite.

With Avi, you can:

- Accelerate implementation with AI-guided onboarding
- Configure subsidiaries, nexus, and item tax categories with step-by-step guidance
- Get contextual answers to tax questions in natural language inside NetSuite
- Understand transaction behavior and configuration impacts in real time
- Validate tax setup and improve audit readiness with in-context explanations

Discover the benefits of AI-powered compliance

Enterprise-grade platform architecture and security

Avalara Agentic Tax and Compliance™ solutions run automatically inside NetSuite – reducing manual work and allowing teams to stay focused on the business.

Accelerate time to value

Go live faster and reduce deployment friction with a guided implementation experience designed to help teams adopt and operationalize compliance inside NetSuite with confidence.

Scale without rework

Expand into new states, subsidiaries, and countries without rebuilding tax logic or reimplementing compliance processes.

Increase accuracy

Automate tax determination using geolocation, item taxability rules, and regularly updated tax content to support consistent calculation as regulations evolve.

Automate return filing and remittance

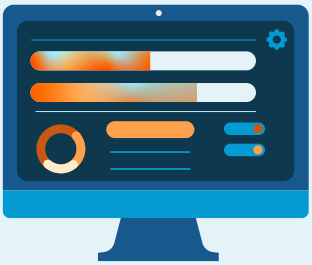
Offload costly, time-consuming returns preparation, filing, and remittance for all jurisdictions every filing cycle.

Enhance exemption certificate management

Automate the creation, collection, verification, usage, and storage of sales tax compliance documents to improve compliance efficiency and audit readiness.

Maintain control as you scale

Expand across entities and jurisdictions while keeping tax configuration, compliance data, and reporting governed within a unified platform integrated directly with NetSuite.



Features
