

Agentic Tax and Compliance™

Let agentic AI do the tax work.

Avalara automates your compliance tasks for speed, accuracy, and scale.

Have Your Agent Call Our Agent™

Avalara is the first tax compliance company to offer MCP servers and AI agents, enabling partners to automate compliance using natural language. You can connect your applications to Avalara's APIs using our MCP servers or build powerful agentic workflows by connecting to our agents. Our AI agents don't just assist – they do the work for you. They're also easy to discover through agent marketplaces, making compliance automation simpler and faster.

AI-driven insights: Instant answers, smarter decisions

Avalara helps you move from data to decisions in seconds. Query in natural language, build dashboards on the fly, and uncover insights without navigating complex menus or various reports.

MCP servers: Smarter agents, smarter outcomes

Avalara MCP servers enable AI assistants and agents in a customer's business application to interact with Avalara products and services to automate complex workflows.

AI-powered advanced rules: Build smarter, scale faster

Create, edit, and visualize complex compliance rules using simple AI prompts – no coding required.

AI-guided onboarding: Go live in minutes, not months

Agent-guided onboarding is simple and easy. Avalara provides prefilled profiles, registration recommendations, and everything in between. No training needed, no delays – just fast, accurate configuration and go-live.

AI-powered customer support: Faster resolutions, without the back-and-forth

Avalara supports with speed and context – resolving issues instantly or escalating them with full history to live representatives, so nothing gets lost in the process.

AI at work across the compliance life cycle

Avalara is redefining tax and compliance, embedding AI agents built into the tools businesses already use. Avalara agents automate key tasks across the compliance lifecycle – from tax calculation and return filing to content classification and research – helping teams work faster and with greater confidence.

- ✓ Fewer errors and greater consistency in compliance execution
- ✓ Time savings by automating repetitive tasks
- ✓ Seamless integration into existing business systems
- ✓ More freedom to focus on growth instead of chasing deadlines

Global tax calculation

Calculates U.S. tax, VAT, and duty logic in milliseconds

Returns filing

Files across all U.S. sales and use tax jurisdictions, at scale

Exemption certificate validation

Digitizes, validates, and stores certificates with AI, zero manual filing

Generative tax research

Provides instant, expert-backed answers from the Avalara tax content engine

Cross-border classification

Automates HS codes and flags restricted trade

AI notice assistant

Reads and resolves jurisdictional notices

Global e-invoicing

Maps invoice data to country-specific mandates automatically

VAT onboarding automation

Speeds up VAT registration with AI-powered document review and simplified data import

Connect and scale with confidence

Avalara agents are available through agent marketplaces:

- Google Agentspace
- Salesforce AgentExchange
- HubSpot agent.ai
- Amazon AWS Agent Marketplace
- Microsoft Copilot Studio

Avalara AI is trained on one of the largest compliance repositories, including:

- Thousands of trusted data sources
- 30,000+ tax jurisdictions
- 3+ billion product records
- Data from more than 190 countries

See what real AI for compliance looks like

Avalara's AI agents help businesses automate tax tasks, reduce risk, and free up teams to focus on growth. Explore how automation at scale can work for your business.
