G2 score:

“We’ve noticed that audits have become much simpler, and states seem less interested in auditing our company now. This is likely because, with Avalara, it’s no longer profitable for them to do so.

G2 Reviewer

“It runs quietly, and we don’t even notice it working, but it performs correctly every time we issue invoices to a customer. It really makes things easy by syncing all of our transaction data directly into Avalara for every month’s filing.

“The automated calculations save time and reduce errors, allowing me to focus more on my core work rather than worrying about tax changes and calculations.
