

Things that your indirect tax solution can't do that Avalara for Oracle Cloud ERP can

Tired of keeping up with ever-changing global tax compliance? Losing patience with long implementation times and manual workarounds? Avalara's cloud-native solutions for Oracle give you embedded, intelligent compliance automation at enterprise scale.

1

Automate geography and tax content updates

No more manually refreshing tax rates and rules. Avalara automatically pushes real-time updates to tax rates, rules, jurisdictions, product codes, and classifications across 244 countries and territories.

2

Serve as a single-point solution for global compliance

Juggling multiple integrations for different tax types and global compliance obligations is inefficient and costly. Avalara delivers a truly unified cloud-native global tax and compliance experience engineered to support every side of business activity through a single connection with Oracle Cloud ERP.

“

We're enhancing a first-of-its-kind automation solution that enables our mutual customers to streamline tax compliance. With Avalara in Oracle Cloud ERP, organizations can manage their global compliance needs in a single system to reduce complexity, improve accuracy, and efficiently help address regulatory requirements.”

Dan Haller,
SVP Demand Generation and Ecosystem Development, Oracle

3

Run tests at scale with less effort and risk

Manual testing is burdensome and inconsistent. Avalara automates end-to-end tests of subledger transaction business flows for Avalara tax calculation, eliminating individual resource investments for manual testing and reducing the risk of business disruption.

Tap into the power of Avalara testing as a service (TaaS)

- Comprehensive test library
- AI-powered test scripts
- On-demand HTML/Excel exports
- Extensive testing scenarios

“

With the cost of manual compliance growing, Avalara helps alleviate concerns around accuracy and risk while saving valuable staff time and resources through automation

Milosh Nedic,
SVP Finance and Accounting, Avalara

4

Provide cloud resilience, performance, and scale

Avalara's cloud-native architecture is built to deliver real-time global compliance, providing low latency and high availability with the speed and scalability to handle enterprise demands.

As the only compliance vendor on the Oracle B2B network, Avalara provides secure operations through single sign-on, encryption, and authentication. This inclusion enhances scalability, streamlines tax workflows, and ensures enterprise-grade performance for Oracle Cloud ERP customers.

Seamless, secure, and scalable compliance built in

- Active-active failover for 24/7 tax calculation
- Cloud service monitoring to ensure uptime and performance
- SOC 2 Type 2-certified for rigorous compliance standards
- Continuous monitoring by product, cloud, and IT security teams
- 24/7 threat detection and response across all Avalara networks

5

Deliver dedicated Oracle Cloud ERP customer support

Does your current indirect tax solution come with a dedicated enterprise support team? Ours does. Efficiently manage implementation and post-production within a designated Avalara Oracle Cloud ERP customer support portal. With our exclusive customer service ownership model, Avalara is always the primary line of defense for solving issues, which helps preclude contacting Oracle support.

Resolve issues quickly with Avalara and Oracle enterprise support

- Dedicated Avalara portal and technical team
- Live 24/7 global support with a service commitment of one hour
- Responsive white-glove service reduces delays and misroutes
- Built-in diagnostic tools provide full transaction visibility
